## Youth Level

- While we could not get race/ethnicity data for chronic absenteeism in this community for most years because the frequency was too low to report, Hispanic, Native American, and Black youth are over-represented statewide in chronic absenteeism.
  - In 2018/2019 the rate of Hispanic youth with chronic absenteeism is disproportionately high compared to the school population.
- More youth have IDEA plans than the state comparison across all years.
- This community has not participated in the NRPFS and should consider participating in the next survey year (2020) to get youth-level data on mental health, gangs, supportive adults and community perceptions of substance use.
- JJI did not have risk assessment scores for diversion from the 2015-2017 assessment evaluation to include. If the county is not using a validated assessment tool, then it should begin doing so (there will be a statewide tool coming in July 2021). If the county does have assessment data in digital format for JJI to analyze, we would be happy to update this table.
- Law enforcement data by race and ethnicity would be very beneficial to have a clearer picture of RED.
  - Although the Census and school data indicate few Black youth, they are over-represented in successful probation discharges.
  - Diversion data at all 3 points is missing race/ethnicity or marked unspecified. Data for race and ethnicity at each juvenile justice system point is imperative for an accurate Racial and Ethnic Disparities (RED) analysis.

## Family Level

- Number of people with bachelor's degrees is lower compared to the state; this could be a result of residents going to college in a different community and not returning to Garden County.
- The percentage of youth with internet subscription and access to broadband internet at home is lower than the rest of the state.

### Community Level

- There are no violent arrests in this community.
- Garden County is doing very well with sealing of juvenile court records. Dismissed or dropped cases should be sealed at 100%, which they are in this community.
  - All others should be sealed at the rate to which youth successfully complete their court requirements (completion of diversion, probation, restorative practice, or other treatment), in which Garden County appears to also be doing very well.

## Policy, Legal and System Level

- Despite not being in a county required to provide counsel under statute, access to counsel is higher than the state average.
- There are few curfew and 3A, 3B, and 3C filings in court so the community is diverting appropriately.
- With respect to diversion practices, the community may want to consider a few things:
  - Not filing all unsuccessful cases, if the youth completed most of the diversion plan
  - Allowing warning letters for the lowest risk youth
  - Comparing diversion fees to court costs so they are comparable. With a higher proportion of children <18 in poverty, perhaps offering scholarships.
  - Having a process for sealing records for youth on diversion with law enforcement and JCMS, as required by statute.
  - If drug testing is needed, it should only be used on cases where the youth demonstrates a substance use issue.

**Neb. Rev. 43-272. Right to counsel; appointment; payment; guardian ad litem; appointment; when; duties; standards for guardians ad litem; standards for attorneys who practice in juvenile court.**

(1)(a) In counties having a population of less than one hundred fifty thousand inhabitants, when any juvenile shall be brought without counsel before a juvenile court, the court shall advise such juvenile and his or her parent or guardian of their right to retain counsel and shall inquire of such juvenile and his or her parent or guardian as to whether they desire to retain counsel.

(b) In counties having a population of one hundred fifty thousand or more inhabitants, when any juvenile court petition is filed alleging jurisdiction of a juvenile pursuant to subdivision (1), (2), (3)(b), or (4) of section 43-247, counsel shall be appointed for such juvenile.

### Community Team Level

- A community lead should be able to get roughly a 75% response, to ensure active participation on planning issues, your response rate was 11.7%.
  - This is a decrease from the 2019 survey, but more people completed the survey; the number of people the survey was sent to increased.
  - The 2020 mean score for Collective Impact is lower than both the Panhandle 2019 response and overall Nebraska mean score, except for shared measurement.
- The community team should be representative of the population of that community but should also include diversity. It might be beneficial to add diverse member to your team. This includes age of team members.
  - There were 4 responses (25%) to race/ethnicity that had town name and two that are missing (12.5), so there may be more diversity than the survey revealed.
- Survey results show no probation, law enforcement, or attorneys on your team, but this may be due to the low response rate.

**COUNTY NEEDS ASSESSMENT FY 2020-2021**

The five elements of Collective Impact are:

- **Common agenda:** Participants have a shared vision and common understanding of both the problem and potential solutions to that problem.
- **Mutually reinforcing activities:** Participant activities must be differentiated while still being coordinated through a mutually reinforcing plan of action.
- **Shared measurement:** Collecting data and measuring results consistently across all participants ensures efforts remain aligned and participants hold each other accountable.
- **Continuous communication:** Consistent and open communication is needed across stakeholders to build trust, assure mutual objectives, and create common motivation.
- **Backbone support:** Creating and managing Collective Impact often requires a separate organization(s) with staff and a specific set of skills to serve as the backbone for the entire initiative and to coordinate participating organizations <sup>q</sup>
