Appendix: Sealed Court Records by Year21

Youth Level

- Data demonstrates that Hispanic youth are over-represented in chronic absenteeism as compared to the school membership of Hispanic youth. While we could not get race/ethnicity data for some races/ethnicities, chronic absenteeism in this community because the frequency was too low to report, Native American and Black youth are over-represented statewide in chronic absenteeism.
- IDEA plans and 504 plans are higher than the statewide averages
- 8th and 12th graders report feeling more depressed than the state comparison. 10th graders report greater suicidal ideation than the state average. 12th graders report more binge drinking than the state average. Both 8th and 10th graders report lower rates of feeling hopeful than the state average.
- 8th and 12th grades report higher gang involvement than the state comparison.
- With so few juvenile arrests, we cannot see a pattern in juvenile crime.
- We did not have risk and needs assessment data for diversion youth, but once the statewide tool is implemented, we will be able to see where the higher risk/needs are for the community.
- Law enforcement data would be very beneficial have for a clearer RED picture.
- Hispanic and Black youth are disproportionally referred to diversion (this may be proportional to LE arrests, but we do not have LE data for comparison). Once referred, they enroll and are successful at the same rate. Hispanic youth also disproportionately have a probation intake.

Community Level

- 12th graders, but not 8th or 10th graders, report that they do not think their neighborhood finds marijuana, alcohol, or cigarettes to be wrong or very wrong.
- Juvenile record sealing is not “automatic” even if statute requires it to seal. Sealing a record requires administrative staff to initiate the process. Dismissed or dropped cases should be sealed at a rate of 100%. All others should be sealed at the rate to which youth successfully complete their court requirements (completion of diversion, probation, restorative practice, or other treatment).
- Data for race and ethnicity at each juvenile justice system point is imperative for an accurate Racial and Ethnic Disparities (RED) analysis.

Policy, Legal and System Level

- Despite not being in a county required to provide counsel under statute, access to counsel is similar to the state average, but still lower than ideal.
- There are few curfew and 3A, 3B, and 3C filings in court so the community is diverting appropriately.
- With respect to diversion practices, the community may want to consider a few things:
 - Not filing all unsuccessful cases, if the youth completed most of the diversion plan
 - Allowing warning letters for the lowest risk youth
 - Comparing diversion fees to court costs so they are comparable. With a higher proportion of children <18 in poverty, perhaps offering scholarships.
 - Having a process for sealing records for youth on diversion with law enforcement and JCMS, as required by statute.

Use of graduated responses prior to discharge	Not sure; students are given every chance to complete the program. last resort is to return them to the court system.	Yes: 47.7% No: 25.0% Not sure: 27.3%
Sealing diversion records	No	Yes: 59.1% No: 22.7% Not sure: 18.2%

*responses included 44 juvenile diversion programs; representing 68 counties/tribe (91.9% response rate)

Community Team Level

- A community lead should be able to get roughly a 75% response, to ensure active participation on planning issues.
- The response rate for the collective impact survey decreased from 2019 to 2020, but some of the measures indicate an improvement in the measures of collective impact (with the exception of constant communication).
- The community team should be representative of the community; however, there should be representation from groups that are over-represented in the juvenile justice system (i.e., Black youth).
- Although the low response rate may affect the results of community team diversity, there could be more representation from other system points not currently represented.

COUNTY NEEDS ASSESSMENT FY 2020-2021

The five elements of Collective Impact are:

- **Common agenda:** Participants have a shared vision and common understanding of both the problem and potential solutions to that problem.
- **Mutually reinforcing activities:** Participant activities must be differentiated while still being coordinated through a mutually reinforcing plan of action.
- **Shared measurement:** Collecting data and measuring results consistently across all participants ensures efforts remain aligned and participants hold each other accountable.
- **Continuous communication:** Consistent and open communication is needed across stakeholders to build trust, assure mutual objectives, and create common motivation.
- **Backbone support:** Creating and managing Collective Impact often requires a separate organization(s) with staff and a specific set of skills to serve as the backbone for the entire initiative and to coordinate participating organizations ^q
