COUNTY NEEDS ASSESSMENT FY 2020-2021

Appendix: Sealed Court Records by Year22

Youth Level

- The number of total youth with chronic absenteeism has decreased in past year.
- While we could not get race/ethnicity data for chronic absenteeism in this community because the frequency was too low to report, Hispanic, Native American, and Black youth are over-represented statewide in chronic absenteeism.
- There were more youth on IDEA and 504 plans in Nance County compared to state averages in previous years, but it has decreased in the recent years.
- Nance County has a 93.1% graduation rate over the last 5 years.
- 12th graders report loss of sleep from worry, being depressed, and considering/attempting suicide at higher rates in Nance County compared to the state.
- 12th graders report current alcohol, binge drinking, and marijuana use at higher rates in Nance County compared to the state.
 - 50% of youth in 12th grade report alcohol use
- 10th graders report alcohol, binge drinking, and tobacco use at higher rates in Nance County compared to the state.
- 10th graders report higher rates of vaping in Nance County compared to the state.
 - There are a lot of 0% reporting in the substance abuse, which is lower than the state in these areas
- The Nance County sheriff did not submit arrest data to the Crime Commission during 2018, so we are not able to determine if arrests for both age groups has increased or decreased from 2018 to 2019.
- NYS domains with the highest scores are Peer Relationships, Leisure/Recreation, Substance Use, and Family Circumstances/Parenting. There should be programs in the community to address these.
- Law enforcement data by race and ethnicity would be very beneficial to have a clearer picture of RED. Compared to the Census and school data, Hispanic youth are overrepresented with multiple charges being filed, at probation RAI overrides, probation intakes, and probation revocation. Note that some of these system points have very low numbers overall which could make the percentages look much higher.
 - There is race/ethnicity data missing at all the diversion points.
- Youth are being referred to diversion and enrolling in diversion at the same rate; successfully completing is slightly lower.

Family Level

- Nance County has lower rates of youth in poverty compared to the state.
- Number of adults with bachelor's degrees is lower than the state average; it may be possible that residents who go to college outside of Nance County find employment where they go to school and do not return to Nance County.
- Youth in Nance County have access to computers and internet at home at higher rates than the state (4th in the state for internet in the home).
- 8th graders report not feeling as supported by adults at home compared to the state

Community Level

- With regard to how youth perceive how their community feels about substance use, 8th graders are reporting lower than state averages for alcohol and cigarettes, 10th graders are reporting lower than state averages for alcohol, and 12th graders report lower than the state average for marijuana, alcohol, and cigarettes.
- Juvenile record sealing is not “automatic” even if statute requires it to seal. Sealing a record requires administrative staff to initiate the process. Dismissed or dropped cases should be sealed at a rate of 100%. All others should be sealed at the rate to which youth successfully complete their court requirements (completion of diversion, probation, restorative practice, or other treatment). Yearly data is available in the Appendix to see if the rate has improved because of legislation, but newer cases should naturally have lower rates of sealing than older cases.
Nance County is very close to 100%, and was at 100% sealed for dismissed and dropped cases in 2017 and 2018
- Data for race and ethnicity at each juvenile justice system point is imperative for an accurate Racial and Ethnic Disparities (RED) analysis. The court trial database (JUSTICE) has a high rate of missing data by race/ethnicity in this county.

Policy, Legal and System Level

- Nance County is not a county required to provide counsel under statute; notably, access to counsel is low in this community.
- There are few if any curfew and 3A, 3B, and 3C filings in court so the community is diverting appropriately.
- With respect to diversion practices, the community may want to consider a few things:
 - Not filing all unsuccessful cases, if the youth completed most of the diversion plan
 - Allowing warning letters for the lowest risk youth
 - Comparing diversion fees to court costs so they are comparable.
 - If drug testing is needed, it should only be used on cases where the youth demonstrates a substance use issue.
 - It is not clear why all first-time offenders are not referred to diversion but perhaps this is due to the ineligible offenses.

Community Team Level

- A community lead should be able to get roughly a 75% response, to ensure active participation on planning issues, your response rate was 20.0% (2 responses).
- The rates of collective impact went up for all elements from the 2019 survey, however this may not be representative of the team with such a small number of responses.
- The community team should be representative of the population of that community but should also include diversity. It might be beneficial to add diverse member to your team (especially because of the patterns of over and under representation.)
- Although the low response rate may affect the results of community team diversity, there could be more representation from other system points not currently represented.

The five elements of Collective Impact are:

- **Common agenda:** Participants have a shared vision and common understanding of both the problem and potential solutions to that problem.
- **Mutually reinforcing activities:** Participant activities must be differentiated while still being coordinated through a mutually reinforcing plan of action.
- **Shared measurement:** Collecting data and measuring results consistently across all participants ensures efforts remain aligned and participants hold each other accountable.
- **Continuous communication:** Consistent and open communication is needed across stakeholders to build trust, assure mutual objectives, and create common motivation.
- **Backbone support:** Creating and managing Collective Impact often requires a separate organization(s) with staff and a specific set of skills to serve as the backbone for the entire initiative and to coordinate participating organizations ^q
