COUNTY NEEDS ASSESSMENT FY 2020-2021

Youth Level

- Very low rates of absenteeism in Sioux County – 0 since 2016/2017, and 100% graduation rate.
- This community has not participated in the NRPFS and should consider participating in the next survey year (2020) to get youth-level data on mental health, gangs, supportive adults and community perceptions of substance use.
- JJI did not have risk assessment scores for diversion from the 2015-2017 assessment evaluation to include. If the county is not using a validated assessment tool, then it should begin doing so (there will be a statewide tool coming in July 2021). If the county does have assessment data in digital format for JJI to analyze, we would be happy to update this table.
- Although the Census and school data indicate few Black youth, they are over-represented in successful probation discharges.
- Law enforcement data by race and ethnicity would be very beneficial to have a clearer picture of RED
 - Successful probation closure or revocation is the only system point that JJI had race/ethnicity data for in Sioux County.

Family Level

- The number of people with bachelor’s degrees is lower compared to the state; this could be a result of residents going to college in a different community and not returning to Sioux County.
- Sioux County is ranked #1 with youth under 18 having a computer at home, but has a lower percentage of youth with internet subscriptions and access to broadband internet at home than the state.
- Sioux County has a slightly higher rate of households without access to a vehicle than the state average.

Community Level

- Sioux County has very few juvenile court cases in the past four years
- Juvenile record sealing is not “automatic” even if statute requires it to seal. Sealing a record requires administrative staff to initiate the process. Dismissed or dropped cases should be sealed at a rate of 100%. All others should be sealed at the rate to which youth successfully complete their court requirements (completion of diversion, probation, restorative practice, or other treatment).

Community Team Level

- A community lead should be able to get roughly a 75% response, to ensure active participation on planning issues, your response rate was 11.7%.
 - This is a decrease from the 2019 survey, but more people completed the survey; the number of people the survey was sent to increased.
 - The 2020 mean score for Collective Impact is lower than both the Panhandle 2019 response and overall Nebraska mean score, except for shared measurement.
- The community team should be representative of the population of that community but should also include diversity. It might be beneficial to add diverse member to your team. This includes age of team members.
 - There were 4 responses (25%) to race/ethnicity that had town name and two that are missing (12.5), so there may be more diversity than the survey revealed.
- Survey results show no probation, law enforcement, or attorneys on your team, but this may be due to the low response rate.

The five elements of Collective Impact are:

- **Common agenda:** Participants have a shared vision and common understanding of both the problem and potential solutions to that problem.
- **Mutually reinforcing activities:** Participant activities must be differentiated while still being coordinated through a mutually reinforcing plan of action.
- **Shared measurement:** Collecting data and measuring results consistently across all participants ensures efforts remain aligned and participants hold each other accountable.
- **Continuous communication:** Consistent and open communication is needed across stakeholders to build trust, assure mutual objectives, and create common motivation.
- **Backbone support:** Creating and managing Collective Impact often requires a separate organization(s) with staff and a specific set of skills to serve as the backbone for the entire initiative and to coordinate participating organizations ⁹
